TERMS OF SALE

NOTE: "NASCA" REFERS TO NASCA-KARP AUCTIONS, INC.

1. A 10% buyers charge will be added to each lot purchased by any bidder. This charge will be based on the amount of the final bid and the charge will be added to each invoiced lot.

2. All bids are per lot as numbered in this catalog.

3. We reserve the right to withdraw any lot prior to sale.

4. All material in this catalog is guaranteed to be genuine unless otherwise described.

5. All successful bidders shall be billed for postage, handling and insurance charges. **Shipments to overseas buyers are made at their sole risk.**

6. We reserve the right to reject any bid from any bidder when we deem a bid not made in good faith. NASCA does not assume liability of any kind arising out of the failure to execute any bid due to clerical error or from any other cause.

7. No "buy" or "unlimited" bids will be accepted. We will act as agents for all mail bidders in the sale. Mail bids will be opened at the next interval over the second highest bid except where the intrinsic or regular market worth of the item dictates an opening at its fair market value. United States currency will not, in conformity with law, be opened at less than the indicated face value.

8. NO BIDS WILL BE ACCEPTED OTHER THAN THOSE RECEIVED IN WHOLE DOLLAR AMOUNTS. THIS INCLUDES AUTHORIZATION TO INCREASE BIDS BY A CERTAIN PERCENTAGE. THOSE INCREMENTS WILL BE REDUCED TO THE LOWEST DOLLAR AMOUNT.

9. Check your bid sheet carefully. We can not assume any responsibility for errors made in the amount bid or lot numbers listed on your sheets. In case of a tie bid, floor bids will take preference over mail bids.

10. It is necessary for all minors wishing to bid to present written parental permission prior to sale.

11. The payment terms for our sales are strictly cash and payment is to be made immediately upon receipt of invoice. **No lot(s) may be taken away at any time unless the purchase price thereof has been paid in full.** Buyers will be charged a late charge of 2% per month on the total purchase price (including buyers and other charges) if payment is not recieved by NASCA within 10 business days of the mailing of the invoice. Established customers who have credit with us shall be permitted, after seeking permission in writing, to have such items held for 30 days without charge after the closing date of the sale. However, no merchandise will be delivered in advance of payment.

12. Title does not pass on any item purchased until payment in full is received for all items. NASCA expressly reserves the right to await the clearance of any check tendered before making delivery.

13. In the event that a collection agency or an attorney is required to collect outstanding accounts, all agency and court costs, witness and attorney fees and all other costs and charges of any and every kind whatsoever incurred by NASCA in collecting the funds due shall be borne by the defendant in the event that judgement is given against him, her or them. In the event of a suit, the signer of a NASCA bid sheet or participant in the auction concedes the jurisdiction of the courts of the State of New York or the United States in the City of New York as NASCA alone shall elect and expressly waives any right of trial in any other place or jurisdiction.

14. No lots may be returned by Floor bidders except on the ground of non-authenticity.

15. Mail bidders may return lots for reasons of authenticity or improper description by requesting written permission to do so within 5 days after delivery of merchandise. **LATE REMITTANCE FOR PURCHASES, HOWEVER, IS CAUSE TO NEGATE THIS PRIVILEGE.** NO RETURNS WILL BE PERMITTED FOR ANY REASON AFTER SETTLEMENT IS MADE WITH OUR CONSIGNORS.

16. New York State sales taxes shall be levied on all New York residents in New York City (if delivered there) at the rate applicable therein and if delivered to the purchaser's residence, at the rate applicable there. Dealers and other persons not resident in New York are reminded that under regulations effective 1 Dec., 1982, sales tax must be collected from any non-New York dealer unless the proper forms have been filled in by the said dealers and filed with the New York authorities.

17. NASCA reserves the right in public auction sales to reopen the bidding under the following circumstances:
    1) NASCA has failed to execute correctly a mail bid.
    2) A party purchasing the lot on the floor has done so in error.
    3) Where a protest is made after the hammer has fallen but before the bidding has commenced on the next lot.
    4) Where the auctioneer has determined that he has overlooked a party still bidding on the lot but before the calling of the next lot.

    With these exceptions, lots will not be permitted to be reopened after they have been hammered down, unless the party awarded the lot will permit the auctioneer to reopen the same. The decision of the auctioneer on these or other points shall be final and binding.

18. **The placing of a bid in this auction sale shall constitute full acceptance of the foregoing terms of sale.**

Thought to be a California item for many years, yet Legal Tenders scarcely circulated in specie-rich California and coins continued in circulation. A California firm would also be unlikely to have notes printed in Kentucky (printing was done in N.Y., when not done locally) and California's enforced note laws made an issue unlikely.

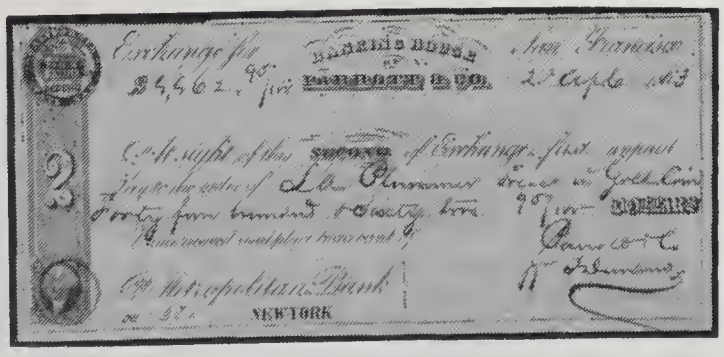
The legislature soon shut down this paper mill. The lettered notes are scarcer than the non-lettered.



32 **San Francisco.** BANKING HOUSE OF PARROTT & CO. Second of Exchange dated 1863, payable to L.A. Plummer Treasurer for **$4,462.95** in U.S. Gold Coin. Payable at the Metropolitan Bank in N.Y.C. A California $10.00 Tax Stamp at top left. **F-VF. (Photo)** **($125-Up)**

Sir Walter was honored on North Carolina notes as the founder of the Roanoke Colony (1585) and the introducer of tobacco smoking to Europe. In 1603, James I fired him as Captain of the Guard with the words "we have heard but rarely of you." James later wrote a tract against the unhealthy practice of smoking (one of the few times he was right). The King followed this up, (cutting off further debate) by giving Sir Walter a tetectomy (he cut off his head), thereby proving smoking could shorten one's breath.

Bank of North America

The Bank of North America was established in 1791 when about $70,000 was subscribed by private shareholders. In late 1781, taking advantage of a French Specie shipment to Boston, Robert Morris, the superintendent of Finance, decided to push forward the Bank of North America scheme with a government subscription of $252,000.

As originally conceived by Morris in 1780, the Bank was to be a government institution, the name, Bank of North America, reflecting the ambitious title given by the Continental Congress to our Treasury Department (The Treasury of North America) back when there were still hopes of adding Canada to the Union. Accordingly, Congress came forth with a charter in 1781 and Pennsylvania helped out with a local charter in 1782.

While the Bank has always claimed that it rendered great service to the country during the Revolution, it only opened its doors in January 1782, months after the surrender of Cornwallis in Virginia, which marked the effective end of the war. The loans made to the Government, while useful, might have been made elsewhere and were in any case a return to the Government of its own money, which the capital represented.

In 1863, there was a debate with Hugh McCulloch over the name to be used by the Bank of North America as a National Bank and he was finally induced to allow them to keep their old name, a privilege extended to others in 1785.

The Insurance Company of North America acquired control of the bank, which ceased to do an active business and the Bank still nominally exists as part of Bank of North America. This offering is no doubt the largest in generations.

470 **Ebenezer Watson's anti-banknote alteration patent,** entered for the district of N.Y. in 1838. Examples printed on face; on the inside is the Watson's circular letter advocating his patent (August 15, 1838) and a brief letter explaining his patent. **VF. (Photo)** **($300-Up)**
Watson's patent consisted of putting the denomination of the note in large numerals on its face and then arranging the text around the numerals. To raise the note would then require massive obliteration of the text. Presumably the text, as in the samples, would be different for each denomination. Watson's system anticipated Lyman's protection of the 1850's, and proved the Perkins plate mandated in New England to be needlessly expensive.
Records of such early patents are very rare, still rarer that any effort was made to exploit them. The present item was sent to the Mount Hope Bank of Bristol, R.I. and is stamped from N.Y. There is a hole in the edge where the paper stuck to the wax seal. Watson's idea was adapted and used extensively in the 1840's and 1850's as the lazy 2, 3, and 5 dollar notes proclaim.

BANK OF THE UNITED STATES

First Bank of the US

The First Bank of the United States, like the Bank of North America was modeled on the Bank of England and was supposed to perform the same duties. Opposition quickly developed among the Anti Federalists to Hamilton's proposal. Hamilton quickly struck a deal with Jefferson; in exchange for Jefferson rounding up six votes for the Bank in the House, Hamilton agreed to round up Federalist support for the Capital to be located on the Potomac. In 1791, a charter was passed calling for a branch bank with its seat at Philadelphia and with a capital of $10 million.

The Bank was successful and conservatively run. Indeed, Albert Gallatin, Jefferson's and Madison's Secretary of the Treasury (1801-1813) was gradually converted to the idea of a charter renewal. But there is evidence that the Bank was a shade too conservatively run, for its only published financial statement (the others were burnt when Washington fell in 1814) shows a cash reserve of 55% behind all its liabilities, compared to a 1/3 ratio of the conservative New Orleans Bank after 1842.

However, the Bank had accumulated enemies and after the House voted to renew the charter, Congress recessed. When it returned, the Senate proved to be equally divided and the Vice President voted against it (1811). The Bank was then put into liquidation and by 1812 had paid stock liquidation dividends of 98% with 5% to follow. Naturally the great bulk of its notes were redeemed, the very few extant being overwhelmingly counterfeit or specimen-proof notes - hence their great rarity today.

Second Bank of the United States

The Second Bank of the United States was chartered in March 1826 for a period of 20 years, with a capital of $35 million. Unlike the First Bank, it started in the aftermath of a war with most banks having suspended specie payments and many having extended their note issues and loans to produce immense paper dividends.

Since the Bank was supposed to encourage a specie resumption, it did so by failing to press home the notes of State Banks for redemption until its own coin reserves were exhausted. Threatened with default, the directors fired the first President, Jones, and elected Langdon Cheves in his place (1819).

Cheves moved rapidly to reverse all of this; perhaps too rapidly. Loans were called in; banks ordered to pay cash for their notes or be sued. Mortgages were foreclosed, making the Bank the owner of many thousands of acres of land in the Middle West. Not surprisingly, this tightening disclosed numerous irregularities in the operation of the Bank, including a $1.7 million series of embezzlements in the Baltimore branch. The ensuing panic and assorted scandals seriously damaged the Bank's prestige and in 1823 President Cheves, having saved the institution, made way for Nicolas Biddle, its third President.

Biddle ran the Bank in the manner of a central lender of last resort and for a while, the Bank recovered some of the public's esteem. But soon trouble came again because of Biddle's disdain for public opinion. He used the Bank to do favors for politicians and newspaper editors that looked like bribery. He defied adverse court rulings by the issue of his branch drafts and fatally, he got mixed up in politics at which he was inept. Thus in 1832, he made the Bank's charter renewal the campaign issue and was soundly defeated. Then when Jackson removed the Federal deposits, Biddle unduly tightened credit, creating a small panic.

In 1836, faced with the prospect of going out of business, Biddle got a charter from the Commonwealth of Pennsylvania for a "Bank of the United States of Pennsylvania", also with a capital of $35 million. The officers, the note designs, even the share certificates as can be seen were kept the same. But there the similarities ended.

The new bank and Nicolas Biddle were not what they had been. The Bank's portfolio was riddled with bad loans, the specie reserve was allowed to fall and the Bank embarked in the next four years in a mania of speculation in State bonds, cotton and other doubtful assets. By 1839, the Bank was in serious trouble and Biddle resigned in favor of his son-in-law, William Dunlop. The Bank staggered from crisis to crisis, selling post notes (such as those at the end of the main office offering) until its credit was exhausted. In May 1841, the firm was declared bankrupt, receivers were appointed and when they were done, there was nothing left for the share holders.

NASCA is pleased to be able to offer the largest collection of such notes to come on the market in many years. Many notes are counterfeit or of suspect authenticity. But in many cases, these are the only known representatives of these issues. Enjoy this offering; its like will not be seen for many years.

557 **ALABAMA. Mobile.** BRANCH. **$5.** A. 1828. FDU. **VG,** hammer cancelled, corner tip off. **(Photo)** **($100-Up)**
Ex lot 497, Elliot Sale, 1979. The cashier's drafts were issued after 1826. They arose because the courts had ruled out that the practice of having branch presidents sign notes was illegal under the charter. As the main office president couldn't keep out a serious quantity of notes by signing by himself, and as Congress refused to change the rules, the so-called Branch drafts were invented. These consisted of a draft payable to a particular person, who then endorsed it to so and so or bearer. It then circulated until redeemed. In a suit before the Supreme Court in 1829, the legality of the drafts was upheld through the efforts of Daniel Webster, thereby infuriating Jackson. George Poe, the cashier, later served as Biddle's cotton agent until 1840.

It is an interesting commentary either on friendship (for the officers) or the logic that Jackson, despite his claims of the Bank's unsafe condition kept HIS account there for years!

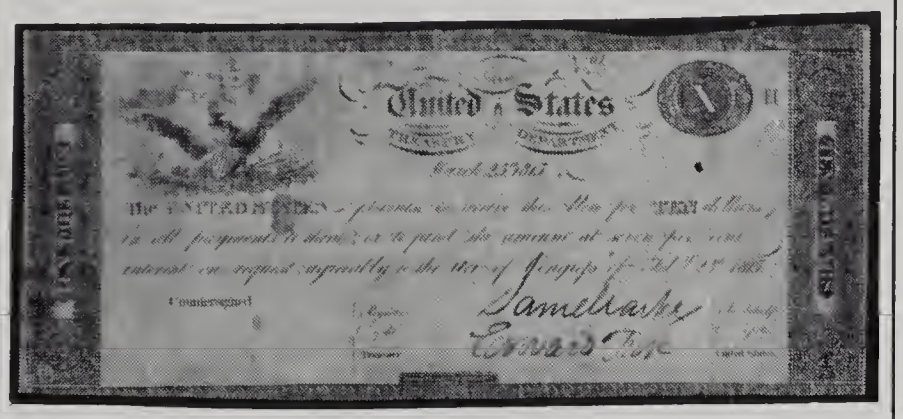
PAPER MONEY

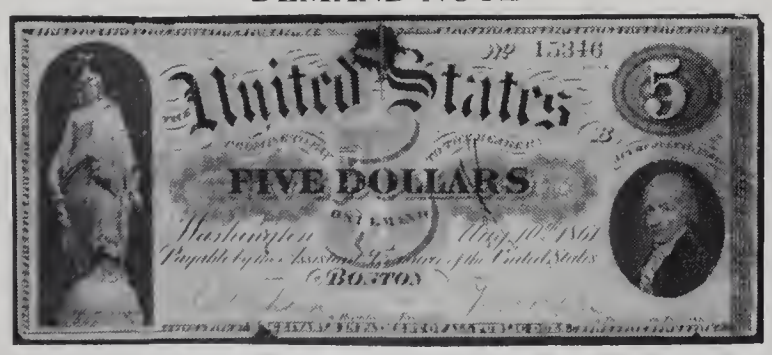
FEDERAL CURRENCY

RARE WAR OF 1812 ISSUE



2001 **$10. July 25, 1815. VG. (Photo)** **($1,000-Up)**
A two signature remainder, not countersigned, dated or numbered, as are virtually all known. An eminently collectable example of the first paper money of the United States, predating the Demand Notes by nearly a half century! These issues (1812-1857) have been sadly neglected as the major reference works have never included them - a situation that may be changing fairly soon.

DEMAND NOTE



2002 **$5. Fr. 3.** 1861. **VG,** repaired. **(Photo)** **($350-Up)**
No. 15346. Better from the standpoint of wear, but with a burn hole at the top, a long center fold split, and many pinholes. The hole has a hinge reinforcement.

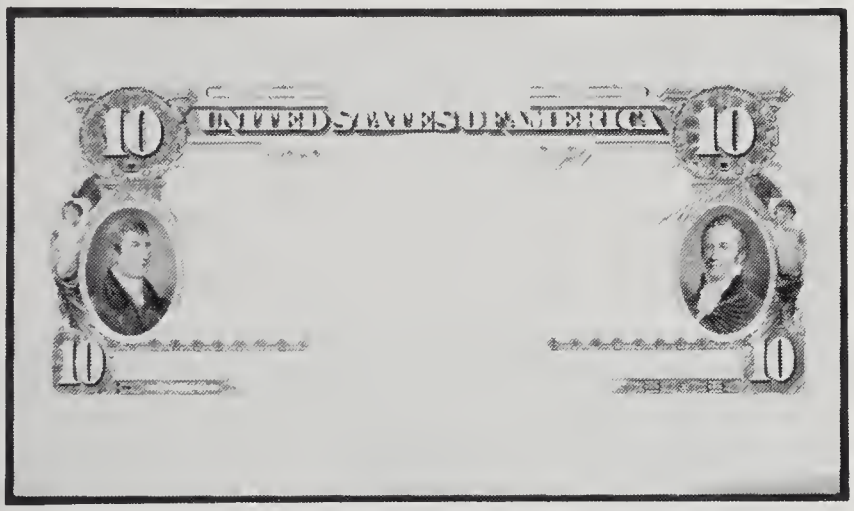
EXCESSIVELY RARE 1901 $10. BISON PROOF



2015 **Proof obverse for the 1901 Bison $10. Unc. (Photo)** **($1,000-Up)**
A lovely proof of the outer border design, including the vignettes of Lewis and Clark. On india, mounted on card. Only rarely do Bureau of Engraving & Printing proofs come on the market, and few are as choice or desirable as this.

2016 **$20. Fr. 135.** 1880. **Fine+.** **($125-Up)**
No. A1741529. A bit dark, with the back off center to the bottom. Far scarcer than generally noticed.

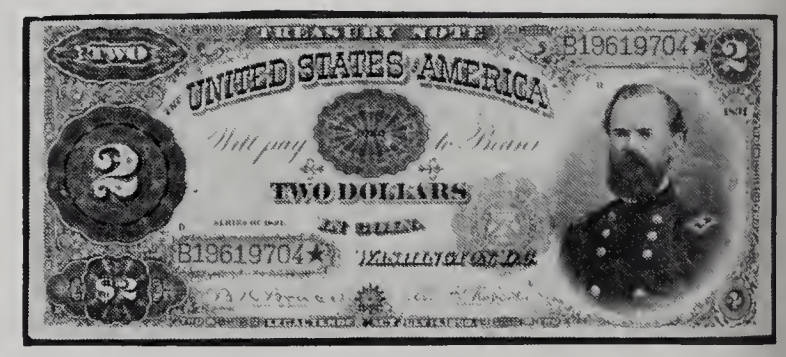
No. A2397432.

The First Note Issued!

2035 **$20. Fr. 317. 1891. Choice AU. (Photo)** **($7,500-Up)**
No. E1. A tremendously important find that has somehow escaped public scrutiny for nearly a hundred years. Very few "true" number 1 large size notes are known - most are the 1862-1863 type (with a number 1 for each 100,000 notes), or the later type with a number 1 for each prefix letter used. This is legitimately **the first note of the type.** Only one other low number Fr. 317 is known - Col. Green's No. E3, now in the Smithsonian. Never actually circulated, but has been "shown around", in the process picking up two broad light corner folds and slightly rounded corners. Otherwise bright and problem-free, and Choice Unc. Would be the highlight of virtually any currency collection.

TREASURY / COIN NOTE

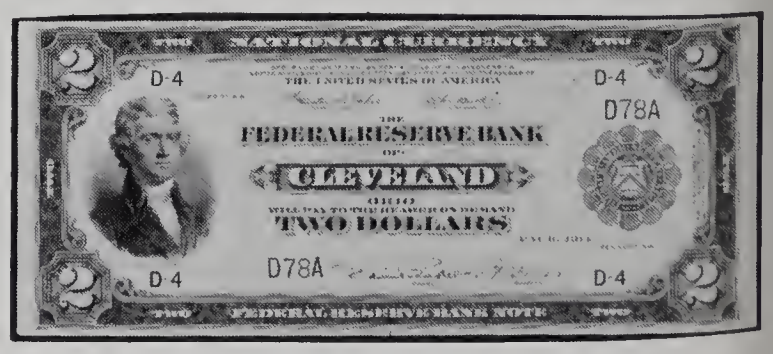


2036 **$2. Fr. 358. 1891. EF. (Photo)** **($300-Up)**
No. B19619704. Looks AU, but has several unobtrusive vertical folds.

FEDERAL RESERVE BANK NOTES

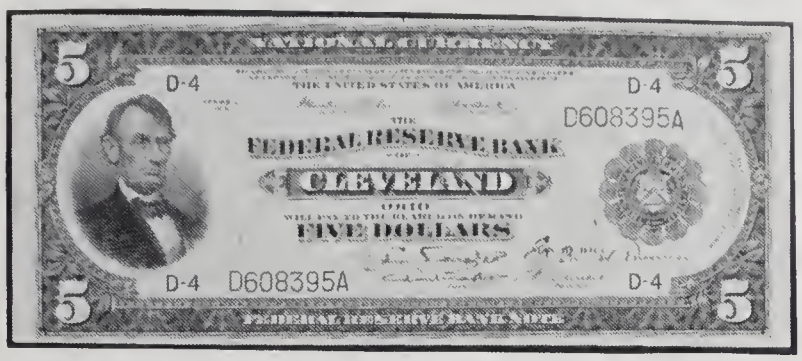
2037 **$1. Fr. 714. 1918. VF.** **($150-Up)**
Star No. C14936*. FP D16, BP 5. One horizontal and three vertical folds, but otherwise clean and crisp.

2038 **$2. Fr. 749. 1918. Choice Unc.** **($275-Up)**
No. A11687909A. Very close to Gem.



2039 **$2. Fr. 757. 1918. Choice Unc. (Photo)** **($300-Up)**
Low No. D78A. Bright, crisp and perfectly centered, close to Gem.

Rare Autographed Note



2040 **$5. Fr. 785.** 1918. **Choice Unc. (Photo)** **($300-Up)**
No. D608395A. **Autographed by both Baxter and Fancher** above their engraved signatures. From a recent Hickman & Oakes sale as AU-Unc., no doubt due to trivial center pinch fold extending about half way up. Without this it would be Gem Unc.

FEDERAL RESERVE NOTES

2041 **$5. Fr. 851a.** 1914. **Choice Unc.** **($75-Up)**
No. B41976717B.

2042 **$5. Fr. 855a.** 1914. **EF-AU.** **($200-Up)**
Star No. C780914*. FP B476, BP 3303. Choice Unc. but for a single center fold.

2043 **$5. Fr. 863a.** 1914; and **$5. Fr. 870.** Both **Choice AU.** **($75-Up)**
No. E27212543A; and No. G54781506A.

DELAWARE

The following collection of National Bank Notes of the state of Delaware is, by a wide margin, **the finest collection ever sold**, and the finest collection ever formed. It is the crowning achievement of decades of searching, and contains examples from every Delaware bank but two. Indicative of the importance of this collection is the fact that **the fabled Grinnell collection had only 6 Delaware notes; this collection has 113.** Indicative of the rarity of Delaware nationals in general is the fact that the "Green Book" by Krause-Lemke, compiling paper money auction records from 1978 to 1982 lists sales records for over 8,000 nationals, only 30 of which were for Delaware notes. It is with great pleasure that we present the following notes for your consideration.

2071 **Proof** of the Delaware state seal on india, mounted on large card. **Unc.,** with very faint foxing. **Rare.** **($150-Up)**

An excessively rare type for this state; less than a half dozen **red seal** Delaware nationals are known for all banks combined. We can find no record of any ever being offered publicly. TEXAS RELATED ITEM

ACT OF SEPTEMBER 28, 1850

2482 Department of the Interior, Office of the Commissioner of Pensions. 80 acre bounty land warrant. 1852. Danforth, Bald. **VG.** **($300-Up)**

Issued to furnish land to veterans of previous U.S. Wars, in this case David Connor, who served in Captain Merriweather's Company of Georgia Militia in the War of 1812. Connor died in 1852 and the warrant was transferred in Texas on the back, complete with three notary seals in 1855, to allow the transfer and certify Connor's death.

Such warrants were issued in 40, 80, and 160 acre denominations; we have seen or heard of only the 80 and 160. The September 28th 1850 act was an amendment to the Act of February 11, 1847 granting bounty lands to Mexican War veterans. Each might receive 40 or 160 acres or in lieu thereof $25 or $100 cash. $233,075 worth was issued for 388,920 acres. As of June 30, 1896 only $3,000 was outstanding of which this accounts for $50.

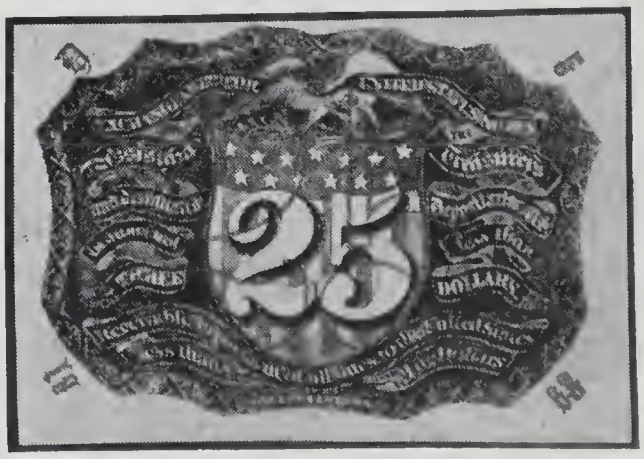
FRACTIONAL CURRENCY

Rare "Negative Essay" Second Issue Notes



2492 **25 cents MRF 2E25FR.2. Choice Unc. (Photo)** **($1,000-Up)**

One of only a half dozen or so known, and only the second offered in recent years. Fully bright and crisp. Though the face is trimmed in on the bottom, the back is very choice, with a sharp, clear "**D-5-18-63**" surcharge, used only on experimental pieces. A fine example of the most popular of the Fractional Currency essays.

2493 **50 cents MRF 2E50R.1. Uncirculated. (Photo) ($600-Up)**

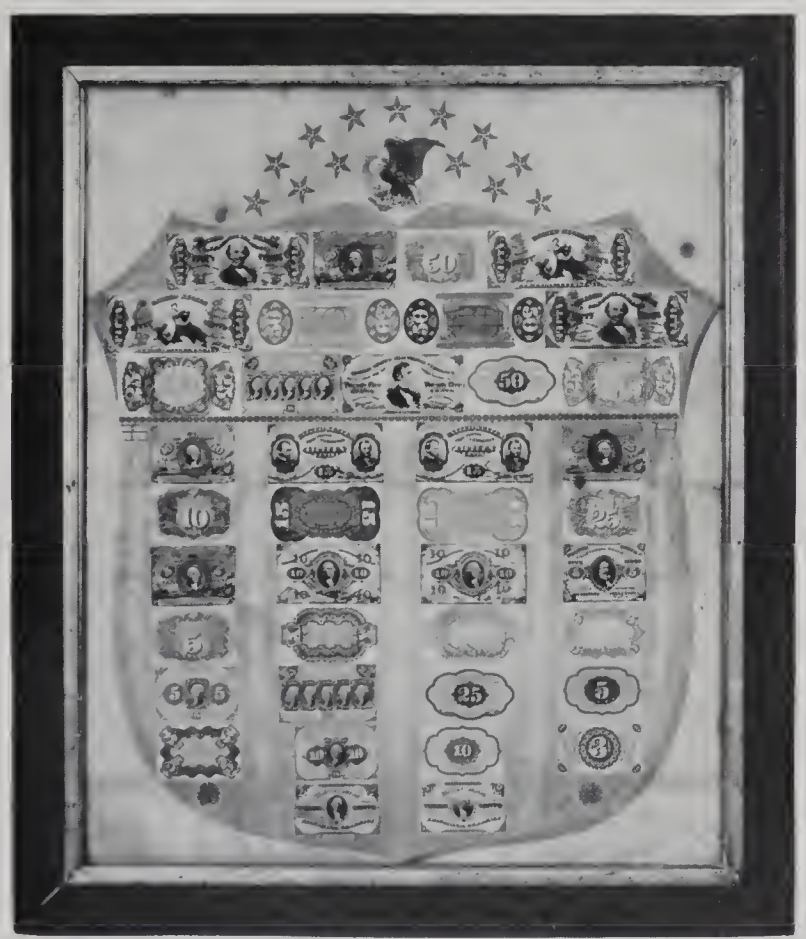
A very rare and desirable note for several reasons - **1)** The rare and popular "Negative Essay" reverse, **2)** The wide margins (wide margin experimentals are all excessively rare), and **3)** The black ink number "19" on the upper right corner of the back, identifying it by Clark number (ex 1893 Frossard sale of Spencer Clark's own collection). Quite aged, as are all known examples of this rarity, with a tiny top margin nick, and a tiny bent corner tip. Slightly better overall than the Fraser (Superior 2/82) and Merkin (1963) examples.

2494 **5 cents Fr. 1230. Full sheet of 20. Choice EF. ($600-Up)**

Fully bright and crisp, with full margins (selvedge) on all sides. Face plate 12, back plate 16. The sheet has a few light folds and wrinkles, but looks and feels Unc.

2495-2496 **No Lots**

GRAY FRACTIONAL SHIELD



2497 **Original Gray Fractional Currency Shield. (Photo) ($2,000-Up)**

Heavily foxed and water stained, as are most, from damp storage in the Treasury Department. No tears or damage, and the notes themselves are brighter than average. Fully original gold inlay frame, with rough board back. Proper restoration could probably make a superb showpiece of this shield.

Arms of NY flanked by Liberty and Justice/inscriptions around and in wreath. Weak strike on obverse as seems to be normal; reverse leaf detail closer to EF. One of the speculative issues by Feuchtwanger (the most common being the Cent), struck in a special combination alloy, which circulated in and after the Hard Times era. Rare in such high grade.

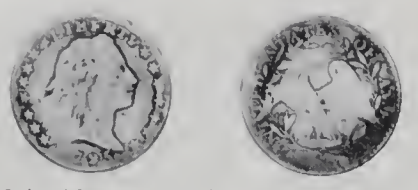
HALF DIMES

THE FAMOUS 1792 HALF DISME

3361 **1792. HALF DISME. VG/AG. (Photo)**
Head left, modeled after that on the white metal Birch Cent (same die cutter)/small eagle flying up to left. Obverse with full legends, reverse weak on upper half, light marks on both sides, but overall better than usually encountered as it has never been holed nor mounted. The reverse is rotated 180-degrees from our normal "coin" turn, being struck on "medal axis" like the issue of 1836 Gobrechts struck in March of 1837 - these two issues being the only regularly circulating U.S. coins intentionally struck this way. This issue has been the subject of many myths and much speculation. The weight of evidence now seems to be as follows: not a pattern but actually struck for, and released into, circulation; mintage probably in excess of the 1500 pieces receipted for by Jefferson, but probably not much more than 2000; dies cut by William Russell Birch from England, who also cut the dies for the original white metal Birch Cent while he was still in England; and the portrait has no connection at all with Martha Washington! We would estimate survivors in all grades combined - and including holed or damaged specimens - at about 150-200 pieces (with only 2-3 of those being Unc.)

3362 **1795.** Flowing Hair. **Fine-12. (Photo)**
Shows close to fine detail in the hair. Usual uneven strike - weakness most apparent on obverse at left and right near rims. Cleaned many years ago, toned back to a nice, natural color. Some pin scratches under the toning near the obverse rims at 2:00 o'clock.



3363 **1795.** Flowing Hair. **V.3. (Photo)**

An extremely difficult specimen to evaluate: face, ear, central hair details, eagle's eye and beak and right wing detail, and other areas suggest a strong VF, but the piece was bent twice (convex 10:00 to 7:00 obverse, concave 10:00 to 4:00 obverse) and circulated in that condition with resultant highly uneven wear, the convex part of obverse worn off on hair ends and the "1" of date gone, and the convex part of reverse through eagle's left wing similarly heavily worn; the bends were straightened since the coin reached numismatic channels. Our jesting phrase of a couple of years ago, "the grading scale does not adequately cover such a specimen", seems appropriate here. On balance, the bidder will have to trade off damage against detail and decide for himself; the coin should be worth more than VG but probably less than Fine.

3364 **1829. AU-50.**

Deep violet-tan toning, a bit lighter in centers, well struck but the obverse die excessively repolished thereby weakening the bust tip; some light marks.

3365 **1831. EF-45.**

3366 **1832. V.8c. Unc.-60. (Photo)**

A nice sharp strike, softly lustrous, but has been cleaned in the past.

3367 **1832. V.9. AU-50/55. (Photo)**

Obverse lustrous on fields, light friction on curls behind eye and over ear and a small rim nick at 7:00; reverse with full cartwheel lustre, just a touch of friction on claws, a nick in field by left end of motto ribbon.

3368 **1833. V.1. Choice AU-55. (Photo)**

Sharp strike, nice lustre, just a hint of friction on the two high curls and claws, two thin pinscratches in obverse field.

3369 **1834. V.3. AU-50.**

A 55 in terms of wear - strong strike, nice lustre, a touch of friction - but several small nicks on each side. Heavy die clashing on obverse, die break down cheek and another connecting cap and 7th star to rim.

3370 **1835. Unc.-60/63. (Photo)**

Needle sharp strike. Prooflike obverse, but the frostiness has been cleaned away. The reverse was not treated unkindly, and displays almost original cartwheel lustre.

Seated Liberty Type

3371 **1837. Large and Small Dates. 2 Pcs.**

Large date EF-40 but cleaned and a scratch in left obverse field; small date AU-50 but with peculiarly granular surfaces and the remains of some encrustation from seawater or earth burial, though details are quite sharp.

3372 **1838. Large and Small Stars. 2 Pcs.**

Large stars VF-30 with some lustre; small stars EF-45 with rose-gold and blue ring toning, scattered small nicks.

3373 **1839. Choice Unc.-65. (Photo)**

Sharp with light to moderate slightly mottled toning.

3374 **1839. AU-50.**

Obverse with many die clashes. Nice peripheral toning.

3382 **1858. Choice AU-55.**

3383 **1858-O. Unc.-63-65. (Photo)**

Full mint lustre and a light amount of toning. Details of drapery at Liberty's elbows are partially obscured by die polishing to remove clash marks.

3384 **1859. Proof-65. (Photo)**

Beautifully toned in blue around both rims.

3385 **1859. Choice AU-55.**

Light violet-tan toning over lustre, a touch of friction on thigh, slightly soft strike at rock and matching upper left wreath.

Lustrous, both sides die clashed, some obverse hairlines.

3387 **1861. Unc.-60.**
Some black stains and a few hairline scratches.

3388 **1861. Toned Choice AU-55.**
Deep grey-violet toning on both sides over lustre, slight friction on thigh and cheek, traces of die clashing but nice surfaces.

3389 **1862. Semi-prooflike Choice AU-55.**
Full hair but soft strike at thigh and matching "AL" on reverse, a trace of die clashing on both sides and semi-P/L fields from repolishing of the dies in an attempt to clear them; light grey-violet toning.

3390 **1862. Unc.-60.**
Clashed dies have cluttered the obverse fields. Some black stains on Liberty's head, and a few hairline scratches in the reverse fields.

3391 **1864-S. EF-40.**
Very sharp strike with full hair and wreath, light marks beneath a greyish toning. Described by Taxay as excessively rare in Unc., perhaps an understatement as the prices realized for specimens offered as "Unc." in the past several years indicate a certain over-optimism in grading.

3392 **1867-S. EF-40.**
Fairly sharp strike, even wear under grey toning, a touch of dirt above cap.

3393 **1868. AU-55.**
Sharply struck. Luster is almost totally subdued beneath natural medium grey toning.

Nice sharp strike with full wreath, somewhat irregular violet-tan toning and light obverse scratches.

Rose-Gold obverse with pale blue at rim, reverse similar but with a band of gold outside the blue, soft lustre, minor marks.

Please note that a 10% buyers charge will be added to each lot purchased on all purchases.

PATTERN

3408 **1868. Pattern 5 cent in Nickel. J.633** (R-4). **Choice Proof-65. (Photo)**

Liberty head left like the 3 cent nickel, Liberty and star raised on coronet/ Roman "V" in wreath with motto and Maltese Cross above. Brilliant mirror fields, slight granularity in centers where the hard nickel did not strike up completely. From a slightly different design than the pattern cent and 3-cent in this sale.

3409 **1868. Unc.-63.**

Well struck, soft satiny lustre, light rose-gold toning, minor reverse freckling.

3410 **1868. Unc.-60.**

An interesting die crack runs from 3 o'clock to 7 o'clock on the obverse. The reverse has been cleaned, resulting in the loss of a good deal of luster. Broken "S" in "CENTS".

3411 **1868. Choice AU-55.**

Lustrous beneath light gold and rose toning, quite well struck except at upper reverse stars, just a hint of friction.

3512 **1976.** Bicentennial 50¢. 60% O.C. to K12, reverse incuse brockage. **Unc.**

3413 **1870. Proof-63. (Photo)**

Strong strike, well mirrored fields (especially on obverse) with touches of light violet-tan toning, 3 small granular planchet flaws on reverse.

3414 **1870. Unc.-60.**

Luster a bit subdued on the reverse.

3415 **No Lot**

3416 **1871. AU-50.**

Satiny obverse field lustre, slightly duller reverse though both sides show cartwheel effect, light friction with minor marks and a small spot on reverse.

3417 **1873.** Closed 3. **Choice AU-55.**

Full cartwheel lustre on obverse, reverse slightly duller, couple of small spots at rim at 9:00 obverse and a splash of red-violet at lower reverse. An unusual piece: there are 5 extra horizontal stripes below the normal ones in the shield, descending slightly to the right, a major blunder visible to the naked eye! First time we have seen this for this date.

3418 **1874. Unc.-60.**

3419 **1876. Proof-63+. (Photo)**

Well mirrored fields, well struck, a couple of pinpoint reverse marks and a touch of hairlining.

One has a rim-break "cud" over stars 7 through 11.

3431 **1883. With Cents. Choice Unc.-65. (Photo)**

Amazing blazing lustre, looking more like the 1904 in this sale than like an 1883, one tiny spot on neck.

3432 **1883. W.C. Unc.-63.**

A trace of green spotting (probably easily removed) on the surface of a section of obverse rim.

Two broad horizontal bands of pink-orange toning wash across both sides. Very attractive!

3445 **1894. Proof-60+.**

3522B **1793. Wreath Cent. S.6** (R-3). **VG-10. (Photo)**

3522C **1809. Large Cent. S.280** (R-3). **Fine-15.**
Head more sharply struck than usual for this date, reverse quite sharp, deep blackish field toning with highlighted devices.

3522D **1836. Quarter. EF-40.**

MECHANICAL BANKS

3523 **"Bad Accident"**. ca. 1890's. By Stevens. A colored gentleman seated in a cart pulled by a mule is partaking of a slice of melon. Suddenly, a young black boy darts out from behind a bush and causes a "BAD ACCIDENT". The frightened mule jumps back, the cart is upset, the coin drops into the bank, and the watermelon smacks the driver in the face! Mechanically sound, and with approx. 90% of the original paint. Not a great rarity, but the subject matter makes it very desirable. **(Photo)** **($700-Up)**

3524 **"Creedmore"**. ca. 1880's. A soldier takes aim at a target on a tree stump. When his foot is pressed, the coin flies off of the rifle and into a slot on the tree stump. ("Creedmore" was the name of a rifle range on Long Island.) Mechanically sound and 90% of the original paint is there. **(Photo)** **($275-Up)**

3525 **"Funny Clown Bank"**. By Stevens. 1880's and 1890's. A clown sits on a globe. When a lever is pushed the globe spins and the clown rises on his hands. Very colorful with about 60% of the original paint. Works, but mechanically well-worn. Probably needs a minor adjustment. **(Photo)** **($450-Up)**

3526 **"Chief Big Moon"**. An Indian is seated in front of a teepee holding a fish while two ducks swim calmly in a pond. Suddenly, a frog leaps out of the pond and tries to grab the fish. Chief Big Moon snatches it out of harm's way. Mechanically sound, but much of the paint is faded or gone. **($500-Up)**

3527 **"Speaking Dog"**. ca. 1880's and 1890's. By Stevens. A young girl is seated on a bench with a paddle in her hand. Before her sits a dog. A coin is placed on the paddle and when the lever is tripped, the coin drops into a box, the dog's mouth opens and he wags his tail. The mechanism works, but not well. About 85% of the paint is gone. **($350-Up)**

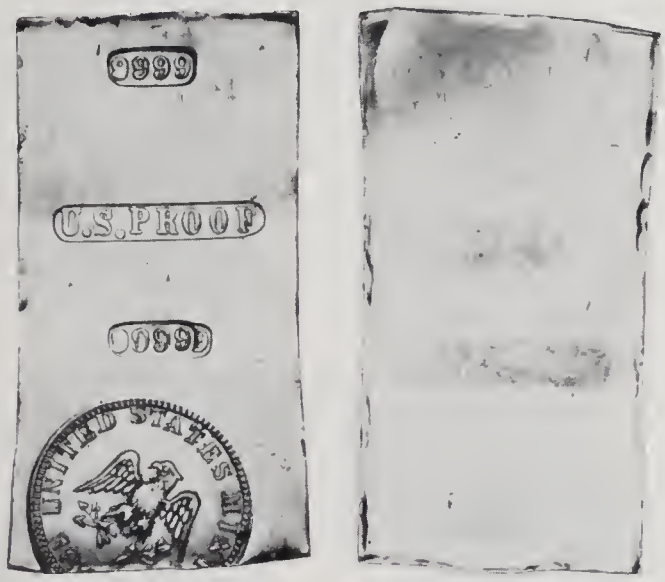
BRANCH MINT ISSUE



4001 **1838 (or 1839?). United States Mint Gold Proofing Bar or Ingot. (Photo)**

From our April 1981 sale Lot 2424, as follows: "Like the Humbert United States Assay Office of Gold piece, this is a proofing piece for use at the Mint in bringing substandard melts up to coinage fineness. From the style of the Mint stamp at the bottom (last, and part of third, digits of date cut off when reducing weight to one ounce,) this one must have been made at one of the Southern Mints (New Orleans, Charlotte, or Dahlonega) when they started operations around 1838-1839. A rare and very interesting specimen, the only one known from a southern branch mint." Undoubtedly **UNIQUE!**.

4002 **1849. Mormon $5. VF-20. (Photo)**

Medium yellow-gold toning with touches of green, slightly soft center strike on both sides, the 8 in the date weak as usual. Overall a pleasing specimen.

DOLLARS

CONDITION CENSUS

4002A **1859. Br. 2. Prooflike Choice Unc.-67! (Photo)**

Not from the Proof dies with date low and recut, but from the business dies (Br.2) with strong date and leaf to right of it recut, no polish around the eye, first feather complete. Nearly vertical die scratches at UNIT and many fine raised die polishing lines diagonally on left half of reverse, patch of faint planchet granularity below date and on bow knot. The fields are fully prooflike with traces of mint lustre within several of the letters in the legends, the head and wreath are nicely frosted. Rich yellow-gold toning with a hint of green.

An incredible business strike specimen! Of the 38 "Unc." auction offerings 1972 through 1983, only two (the Stacks's sale pieces in 1978 and 1980) come anywhere near the quality of this one. Of 6 pieces auctioned as Proof in the same period half appeared before Breen's Proof book was available, and this coin may have been one of those pieces since our consignor purchased it from a southern dealer as Gem Proof some 8-9 years ago. Though we list it here only as "Condition Census", it may well be the finest known business strike.

4003 **1874. EF-45. (Photo)**

Deep yellow-gold with touches of orange, lustrous around legends, a small spot before chin.

Please note that a 10% buyers charge will be added to each lot purchased on all purchases.

QUARTER EAGLES

4004 **1863-S. EF-40. (Photo)**

Medium reddish-gold toning, lustre at stars, legends, and outlining devices. Reverse strike somewhat weak as is almost diagnostic for the date. One of the habitually underestimated rarities in the Quarter Eagles, partly because almost all existing specimens are well worn and partly because it has been carried in pricing guides as a "common date price" in Unc. because of the mintage rather than the number of survivors. This is gradually being corrected, with the 1984 Red Book prices substantially higher (on this as on other S-Mint dates) than in the 1983 edition. For the period 1972-1983, only 23 specimens were offered at auction (3rd lowest total for any S-Mint $2.50, behind 1854-S at 12 and 1862-S at 17); the average grade in catalogues for that period was 28.3 (3rd lowest average grade for S-Mint $2.50, behind 54-S at 17.7 and 65-S at 27.6). At the time of our 7/81 Sale, we noted that no specimen had been photographed in an auction in 11 years; the only Unc. offered in the period, and probably the only one in existence, was the Eliasberg piece in 10/82.

4005 **1803. Kettle Token. Fine.**

Modeled after the U.S. Quarter Eagle of the period by Kettle of England and intended as a gaming token, this issue is the only "1803 Quarter Eagle" available; unlike many, this one has not had Kettle's name removed in an attempt to pass the piece (which is brass) off as gold! Somewhat dirty, with obverse scratches and a dig at upper reverse, this one is still superior to most (they are usually found in AG).

4006 **1877-S. AU-50. (Photo)**

A touch of light friction on the highest points.

4007 **1906. Choice AU-55.**

Medium yellow-gold toning, full cartwheel field lustre, nice strike, just a touch of friction at curl over ear and at bun.

4008 **1908. AU-50.**

Lots of lustre. Only faint hints of friction on the high points.

4009 **1911-D. EF-45/45. (Photo)**

Nice light red-gold toning, lustre around legend areas and in recesses, mintmark stronger than usual, a pleasing piece, graded by ANACS as 45/45 (E-5747-T) though with some claim to AU status.

THREE DOLLAR GOLD

4010 **1874. VG-10.**

Extensively jewelry polished, and mount removed at top.

HALF EAGLES

UNIQUE PATTERN - UNIQUE DIE COMBINATION

4011 **1797. Pattern Half Eagle in Copper. J.24, (Unique!) AU-50. (Photo)**

Die trial of the 16-stars, small eagle design, but it has apparently never been noticed that it is **not** the Breen 12-K dies but rather the only known muling of the 1797 Breen 12 obverse with the 1795 (& 1796) "I" reverse die with the single/double leaves at wreath top, distinctly different from any other small eagle reverse in that respect and in the "twig-like" right leaf of the palm branch! The piece, which appeared in New Netherlands' 9/53 auction, was defaced at the Mint by three blunt chisel marks on right obverse and four on center and left reverse while lying on an anvil, but there is no question about the reverse die variety. As this die combination is otherwise unknown, the piece acquires significantly greater importance to the specialized collector, constituting a pattern more than a simple off-metal die trial.

4012 **1803.** Kettle Token in Silver. **Fine, holed.**

The Kettle "gaming token" modeled after the Half Eagle of this date (though not an overdate!), struck in silver, Kettle's name almost completely removed (though what on earth the remover intended to pass this silver piece escapes us), light obverse scratches, but unfortunately with a hole at top of cap. This is the first Kettle piece we have ever handled in silver.

4013 **1811. Large 5. Br.1-A** (R-4+). **EF-40. (Photo)**

Medium greenish-gold toning with russet-gold at borders and outlining the devices, well struck from heavily clashed dies, light hairlines from a past cleaning.

4014 **1872-CC. Good.**

4015 **1881. EF-40.**

Baggy and polished, in a screw-together pendant mounting.

EAGLES

4015A **1894. Unc.-60.**

4015B **1902-S. Unc.-63.**

Original frosty mint lustre and some scattered bag marks each side, including a tiny "tic" on obverse rim opposite fourth star.

4016 **1907. Pair of Liberty Fives. (Photo)**
Both Unc.-60, attractively mounted as cufflinks in screw-together mountings. Considerably better than the usual polished EF's and AU's normally found in jewelry.

4016A **1894. Unc.-60.**

4016B **1902-S. Unc.-63.**

DOUBLE EAGLES

4017 **1907.** High Relief, Flat Rim. **EF-40. (Photo)**
From the H.I.M. 7/83 Sale, Lot 291, where it was catalogued as follows: "Pleasing deep yellow-gold fields with touches of orange, light and even wear on the highest areas, several small edge tics. An attractive circulated specimen of this popular type for the man who doesn't feel like paying the going price for an Unc.!"

4017A **1922. VF-20.**
A jewelry piece, with innumerable tiny marks and characteristic wear.

"QUARTER UNION"

4018 **ND(ca.1945). $25 Tiffany Money.** Silver, 31.5mm. **Unc.-63.**
Tiffany monogram in center, 3 stars above, "Twenty Five Dollars" below/ "Tiffany Money/redeemable in merchandise/at'Tiffany & Co.", serial number 65284 at bottom. Golden-tan toning with touches of violet at rims. First we have encountered of this unusual denomination!

4019 **1924. Satiny Unc.-65. (Photo)**
Gem strike and color but there is a stain on the obverse.

4020 **1927. Unc.-63/63. (Photo)**
Lovely obverse with medium reddish-gold center and a greenish rim band over full bright lustre, fewer marks than usual for the grade; the reverse is similarly toned, but there is a shallow bag slide down wing feathers at right.

Just a hint of wear on the very highest points. Satiny smooth surfaces lightly and evenly glazed with natural grey and iridescent blue toning. Struck sharply and evenly, except for a bit of shallowness in the 7th through 10th stars. Would be right at home in anyone's Unc. Type Set.

SILVER DOLLARS

The Famous "PIECE OF EIGHT"

4337 **1746-Mo. Pillar Dollar, Mexico City Mint. EF. (Photo)**
The standard Mexican (and South American) 8 Reales coin on which our own silver dollars were based when the U.S. Mint started in 1792. This specimen was struck during the reign of Philip V of Spain, and pieces just like it circulated extensively in America down into the 19th Century. Even light wear, an above average example. See p.2 of the Red Book for further details.

4338 **1795. Flowing Hair.** (R-5). **VG-8.**
Even wear, a slightly soft strike at date and matching top reverse though everything is readable, medium grey toning with lighter devices, thin scratch from bust to rim at 6:30 obverse. The 3-leaf variety of this popular 2-year first type of U.S. Silver Dollar.

Draped Bust Type

4339 **1797.** Stars 10 & 6. **B.3a. Good-4.**
Eye clear, some hair detail, reverse weaker; some sort of major damage to the obverse on the shoulder and neck has been imperfectly repaired - a roughly round area about the size of a Half Dime with a depression in the center.

4340 **1798.** Heraldic Eagle. **B.27.** (R-2). **VF-35. (Photo)**
Even wear, motto on reverse almost complete, not quite up to full EF standard but a pleasing type coin.

Clear date, scuffs, lower reverse well worn.

4342 **1799/8. B.1.** (R-5). **Good-4.**
Both sides convex due to die buckling and thus heavily and unevenly worn on center and lower obverse/center and upper reverse; date, legends, and remaining devices closer to VG.

4343 **1801. B.3.** (R-3). **Holed VF-20.**

Rim nick at 8 o'clock on obverse.

4352 **1873. Proof-63. (Photo)**

4353 **1876. Nevada "Centennial Dollar". J.CM-36. Unc.-63/AU-50. (Photo)**
Lovely mining scene in Nevada mountains/Revolutionary soldiers guarding Liberty Bell; obverse toned a particularly handsome blend of deep rose and electric blue, reverse darker and somewhat scuffed (from lying with that side down for years?). A regular Mint product, struck from silver ore from Nevada at the Centennial Expo in 1876, silver mintage only 2526 pieces; weight 27.45 grams, a bit more than a Trade Dollar.

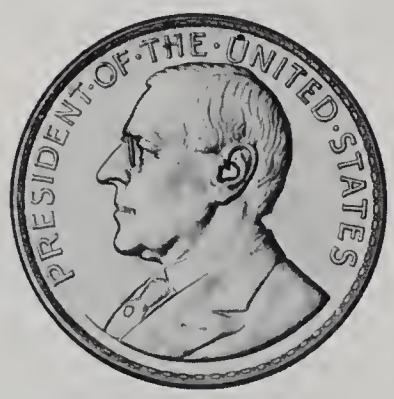
A rare variety, worth many times the price of a normal "S".



4371 **1920. The "Wilson" Dollar. HK-449, silver. AU-50. (Photo)**

Bust left of Woodrow Wilson, signed on the truncation with the "M" of George T. Morgan/ Liberty holding scales as a Cupid pours gold from a cornucopia into a coining press. Struck on the occasion of the opening of the Manila Mint in the Philippines, the presses have been built in our Philadelphia Mint; the medals were also official Mint products and are nearly identical in weight to the Morgan Dollars. Silver mintage was only a couple of thousand pieces.

4372 **Unc. Mintmarked Morgans. Group of 4 Pcs.**

1890-O, typically struck with soft breast feathers, Unc.-63., small rim nick on the reverse. 1897-S, Unc.-63. 1899-O, Unc.-60. 1902-O, Unc.-63.

4375A **1922-1923. Two Uncirculated S-Mint dollars.**

1922-S. Unc.-60, full mint lustre and numerous scattered small and relatively minor bagmarks. 1923-S. Unc.-60+ to Unc.-63, frosty lustre, light golden toning, and relatively few marks, most of them on reverse.

4376 **1924. Unc.-63.**

Both sides toned an attractive shade of pink.

4377 **1926-S. AU-55.**

4378 **1928. Unc.-60+. (Photo)**

The lustre on this low-mintage (360,649) dollar is well above average. Unlike many of the other dates in the series, 1928 P's are usually well struck, and this coin is no exception. A light bagmark extends from the tip of Liberty's nose out to the rim, and there a a few others on the reverse side. A small rim nick is visible at the tip of the eagle's tail.

4379 **1928. AU-50.**

Well struck, just a few minor bagmarks. The lustre on this key "Peace" dollar is just a trifle too subdued to put it into the AU-55 category.

4380 **1928. EF-45.**

Lowest mintage of any dollar in the "Peace" series. This specimen retains most of its lustre and is very close to AU-50.

4381 **1934-D. Unc.-60.**

Average lustre and strike, and relatively free of contact marks. There is a rim nick on the reverse at 4 o'clock.

4382 **Peace Dollar Group. 5 Pcs.**

Unusual Civil War Medal

6162 **ND (ca. 1892). 7th Division, Army of the Ohio, at Cumberland Gap.** Aluminum, 38mm., by Chapelle. **Unc.**

View of the south side of Cumberland Gap/ inscription on the Division, wreath, dates June 18th & Sept. 18, 1862. This would be the Division of GenG. W. Morgan, stationed at the north side of the Gap with 8000 men as early as March, 1862, facing a force of 4000 Confederates under Rains (part of Kirby Smith's command). Apparently they crossed the Gap in June and drove Rains back; they were themselves driven north in August when Smith sent a force of 9000 in Stevenson's Division to free the Gap for the advance of CSA troops during the Stone's Mountain campaign. Morgan was fruitlessly pursued into the mountains to the east for a while by Smith's troops, but it seems that once the CSA forces all moved north, Morgan doubled back and held the Gap again temporarily to prevent CAS renforcements and suplies from reaching the right flank units. We have never encountered this piece before, and it took a bit of digging to discover the above information about the activities of this totally isolated Federal force!

First and thirds parts of the ribbon inscription were clear to us; we thank Mark Turvin for the Railway Mail Service info. One of these pouch hooks appeared in "Butch Cassidy"! Only specimen we have ever encountered.
